LONDON, JAN. 13.
There are at present millions of New South Wales and Victorian Government stock awaiting realisation.

A cablegram has been received stating that New South Wales has decided to issue its Treasury Bills at 4 per cent, with a minimum at par. This action is greatly deprecated. It is held to have injured the prospects of the successful issue of the Treasury bills, which, it is considered, cannot be successfully placed at less rate of interest than 4 per cent. Intending purchasers, who had already arranged to take large amounts of the bills at 4 per cent, refuse to touch them at 4 per cent. Any attempt to force a public loan will produce a panic.
